**DWI IHSAN: *Psychosocial Conditions of Students Experiencing Gambling Addiction Online "Slot" in Dago Village, Coblong District, Bandung City, Supervisors: Moch Zaenal Hakim and Sinta Yulianti Suyono***

*Psychosocial conditions are one of the many things that can change a person when he becomes a gambling addict online. Psychosocial theory takes into account the patterns of individual development that emerge from the biopsychosocial processes. Human life as individual experience results from the interaction and modification of three main systems, (1) biological system, this system includes all processes important for the physical functioning of the organism, (2) psychological system, this system includes all mental processes that are centered on one's abilities to interpret experiences and take action, (3) social system, this system includes processes through which a person becomes integrated into certain ways of life of people in an environment. This study aims to find out how the Psychosocial Conditions of students as players and gamblers online "slot" in terms of Biological, Psychological, and Social aspects. The method used in this research is descriptive research method using a qualitative approach. The data sources used are primary and secondary data sources. Data collection techniques used were in-depth interviews, observation and documentation studies. Determination of informants is done using Snowball sampling totaling 10 informants including 7 student players as well as gamblers online "slot" and 3 informants who are the perpetrator's peers. Checking the validity of the data used is triangulation. The results of this study are obtained that gambling online "slot" has a significant effect on the players, in this case students, related to biological, psychological and social aspects that the players are not aware of. So it is proposed a program to solve the problems found, namely a program with the name "Increasing Student Self Awareness in Dago Village, Coblong District, Bandung City about the dangers of online gambling games "slots". In this program using the method Group Work by group type Educational Group, by conducting individual and group socialization and counseling activities.*
